

HST-72 & HST-96 KW Watt Meters

DIN Analog Panel Meters

72mm and 96mm Analog Panel Meters. Used for measuring the active and reactive power of AC single and three phase networks. They are primarily built in switchboards and electric devices.

HST-72 KW - 72mm
HST-96 KW - 96mm

Specifications

Measuring Range: 110V, 220V, 380V, 440V/1A, 5A.
Accuracy: Class 1.5.
Frequency: 45-65 Hz.
Test Voltage: 2kV, 50-60Hz.
Transducer: External.

Pointer Length: HST-72: 38mm, HST-96: 55mm
Composition: Glass window, ABS Resin frame and case, bakelite base mounting fitting included.
Color: Black base and frame, White scale plate and meter body.
Pointer: Stick shape in black color.
